

Altura™ is a phosphate and zinc nutritional product for progressive farmers interested in more mobile and significantly more available phosphate to aid root growth and development. Built with C² Technology, the unique formulation of **Altura** maximizes uptake and extends availability of phosphorus for a robust approach to early season nutrient management.

FEATURES

- Unique C² formulation maximizes phosphorus and zinc availability and mobility in the soil and superior uptake in the plant
- Contains highly available Ortho Phosphate and readily accessible zinc
- Non-phytotoxic nutritional formulation is flexible in application and sound for many crops in many growing conditions

GROWER BENEFITS

- Immediately available phosphorus enhanced to provide extended nutrient access at critical growth stages for a season-long nutritional solution
- Pairs well with other nutrients to increase their uptake and performance
- Supplies phosphorus and zinc to encourage early season growth and development, supporting yield and quality goals

RATES

2-10 gal/A for most crops and applications

ANALYSIS

7-21-0 .2 Zn with C² Technology
