

Blackmax® 22 is a nutritional enhancement tool designed to positively impact nutrient availability and support positive soil attributes. As part of a fertilizer program, the C² Technology in Blackmax 22 can give growers more nutrition for their crops and provide a better soil environment.

FEATURES

- C² Technology to enhance applied nutrient availability and uptake
- Contains extracted carbon and a carbohydrate package for nutrient chelation and soil amendment properties
- Sound, efficient formulation compatible with many fertilizers

GROWER BENEFITS

- Enhanced existing nutrient mineralization and nutrient solubility
- Designed to promote beneficial microbes to drive soil processes that make nutrition more available to the growing crop
- Sound, efficient, flexible formulation

RATES

0.5-4 gal/A banded or broadcast

ANALYSIS

0-0-4 with C² Technology

WHAT IS C² TECHNOLOGY?

C² is a proprietary technology consisting of extracted carbon and carbohydrate reacted with nutrients for improved soil health and plant performance.

**Carbon:** Increases nutrient availability by fostering growth of beneficial soil microbes and positively impacting soil attributes creating better holding capacity for nutrients and water.

**Carbohydrate:** Improves nutrient uptake and availability in both soil and foliar applications.
