

Levitate® is a Loveland Products proprietary starter fertilizer formulated with a proven fertilizer biocatalyst as well as a blend of ACA Technology, fulvic acids and EDTA-chelated zinc. For starter fertilizer users, **Levitate** is the only starter combining three fertilizer efficiency technologies to increase nutrient availability and uptake – **Levitate** is the proven platform in plant nutrition.

FEATURES

- Low-salt, seed-safe, highly compatible at-planting nutrition tool for many crops and growing systems
- Contains Acetate, Biocatalyst and Fulvic Acid Technology
- User-friendly liquid fertilizer with utility across many crops

GROWER BENEFITS

- Phosphate and zinc drive early season growth and development to meet the early season demands of a developing crop
- Buffers the effect of salts that can harm young seedlings
- Enhances nutrient availability and uptake at a critical time

RATES

3-5 gal/A on corn in-furrow or 2x2 placement

ANALYSIS

5-15-5 with 1.5% Zinc

WHAT IS C² TECHNOLOGY?

C² is a proprietary technology consisting of extracted carbon and carbohydrate reacted with nutrients for improved soil health and plant performance.

Carbon: Increases nutrient availability by fostering growth of beneficial soil microbes and positively impacting soil attributes creating better holding capacity for nutrients and water.

Carbohydrate: Improves nutrient uptake and availability in both soil and foliar applications.
